SUMMARY

Java backend developer with hands-on experience building secure, production-style **REST APIs** using **Spring Boot** and **Spring Security**. Implemented **JWT-based authentication**, **role** and **permission-based authorization**, structured **logging**, and **integration testing** in real-world backend projects. Familiar with **ASP.NET Core Web API** and modern backend engineering practices.

EDUCATION

Thakur College of Engineering and Technology, Mumbai, India 2023 - Present
Bachelor of Engineering in Computer Engineering | **CGPA: 8.2**

SKILLS

Backend - Java, Spring Boot, Spring Security
Backend (Secondary) - C#, ASP.NET Core Web API
Security - JWT Authentication, Refresh Tokens, Role & Permission-based Authorization
Database - PostgreSQL, SQL Server, JPA/Hibernate, Entity Framework Core
Testing - Integration Testing
Logging - SLF4J, Logback
Version Control - Git, GitHub
Basics - HTML, CSS, JavaScript

PROJECTS

Job Portal System — Spring Boot, PostgreSQL, JWT | **GitHub** Dec 2025 - Jan 2026

- Built secure **REST APIs** using **Spring Boot** following **layered architecture** (Controller, Service, Repository).
- Implemented **JWT-based authentication** with **refresh tokens** using **Spring Security**.
- Designed and enforced role and **permission-based authorization** for Admin, Recruiter, and Job Seeker roles.
- Developed backend modules for Authentication, **Company, Job, Job Application, and Resume** management.
- Modelled relational database schema and entity relationships using **Spring Data JPA** and **Hibernate**.
- Integrated **Swagger/OpenAPI** for API documentation and backend demo support.
- Implemented structured logging using **SLF4J** and **Logback** to improve debugging and request traceability.
- Wrote **integration tests** to validate end-to-end API workflows, including authentication and authorization flows.

Student Management System — ASP.NET Core Web API | **GitHub** Aug 2025 - Oct 2025

- Developed **CRUD REST APIs** using **ASP.NET Core Web API** for managing student records.
- Designed database schema and relationships using **Entity Framework Core**.
- Implemented data persistence and API validation following REST principles.
- Tested APIs using **Postman** and managed source code with **Git** and **GitHub**.

CERTIFICATIONS

- **SQL** in Engineering Workshop| TCET, Mumbai Feb 2024
- **Git** and **GitHub** Workshop | Mind Benders Club, TCET Nov 2024
